EDUCATION

University of Tennessee, Knoxville

Knoxville, TN

Bachelor of Science in Computer Science

Aug. 2024 – May 2028

- Relevant Coursework: Data Structures, Computer Algorithms & Organization
- Involvement: Hack4Impact, Indian American Association, Management Society

EXPERIENCE

Agentic AI Developer

Jan. 2026 – Present

LaRevela

Franklin, TN

- Architected and implemented an AI-driven lead engagement backend (Python, FastAPI, MySQL), automating 60%+ of inbound outreach
- Built a scalable asynchronous orchestration system polling Gmail, classifying lead intent via OpenAI APIs, and triggering real-time workflows with <1-minute response latency
- Integrated Calendly-based scheduling workflows with personalized links, increasing demo booking conversion by 35%
- Designed robust SQLAlchemy/MySQL models to track leads and conversations with deduplication and data integrity
- Implemented modular microservice structure separating email ingestion, AI processing, and scheduling workflows, enabling rapid feature scaling
- Optimized backend performance, reducing processing time for high-volume email threads by 30%

Product Manager

Sep. 2025 – Present

Hack4Impact

Knoxville, TN

- Led a 9-person development team building a full-stack platform (React, Next.js, PostgreSQL), replacing paid software and saving \$6,000 annually
- Defined and implemented system architecture and feature roadmap, balancing scalability, maintainability, and performance
- Oversaw database schema design, API integrations, and component-level architecture, ensuring modular, maintainable code
- Managed Agile workflows using Jira and GitHub, conducted code reviews, and implemented CI/CD practices, resulting in 15% faster deployment cycles

Undergraduate Research Assistant

Aug. 2025 – Jan. 2026

University of Tennessee, Knoxville

Knoxville, TN

- Developed a computer vision pipeline using PyTorch, TensorFlow, and YOLO, achieving 84% re-identification accuracy on multi-frame datasets
- Trained models on CUHK03 (14K+ images, 1,467 identities) to generate embeddings for identity matching
- Built a system to detect, track, and cluster individuals across video frames, reducing manual labeling by 30% and enabling automated multi-frame identity tracking

Software Engineer Intern

May 2025 – Aug. 2025

LeadsPedia, Inc.

Franklin, TN

- Developed a full-stack HR platform (PHP, MySQL, JavaScript) for 20+ employees, including PTO tracking, performance management, and analytics
- Implemented role-based access control (RBAC) with session authentication, preventing 100% of unauthorized access attempts
- Designed relational database schemas with audit logging and soft deletes, enabling scalable reporting across 5+ workflows
- Delivered features on schedule within 8+ Agile sprints over 3 months, ensuring cross-team alignment and reducing technical debt

TECHNICAL SKILLS

Languages: Python, PHP, JavaScript, C++, Java, SQL (MySQL/Postgres), HTML5/CSS3, React, Next.js

Frameworks/Libraries: PyTorch, TensorFlow, OpenCV, scikit-image, NumPy, pandas, Bootstrap 5, Tailwind

Developer Tools: Git, GitHub, Docker, MySQL Workbench, VS Code, PyCharm, Figma, Jira

Systems & Platforms: Linux/Unix, Nginx, Google Cloud Platform (GCP)
